calibre.

The announcement of further gold envacements for to-morrow's French steamer of \$2,100,000 was the signal for a general selling' movement by this class of speculators. It had been taken for granted that large exports of gold would be made by Saturday's steamer, but the additional shipment by to-morrow's steamer, bringing the total to \$2,600,000, was a surprise. This shipment is generally believed to represent a triangular operation; that is to say, on London's order to meet a demand on that centre. Among the exporters are some who have strenuously held that no profit could be made in exporting gold at the highest figures yet touched for exchange, and the rate for demand sterling to-day was \$\frac{1}{2}\mathbf{c}\mathb announcement of further gold en-

on the movement.

It is fair to assume, therefore, that some concession has been offered to make a margin of profit on the transaction, but in any event the metal is recognized as being in effect a loan. It is evident that the need of money here in active trade has not kept pace with the currency expansion. The low rate of money, coupled with the large loans of New York banks and their small surplus, reflect the eagerness of capital to place credits, but the demand for credits is not sufficient to absorb the surply, so capitalists must look abroad, where interest rates rule higher. For some time the merchandise credits resulting from our favorable trade balance have been left at interest abroad. This country's large gold production and the present cutting off of the Transvaul gold supply also make us the source of supply for the money metal. The net result is that we are not only refraining from calling home merchandise credits, but are shipping out the money metal to meet the needs of foreign markets.

NORFOLK, VA., May 2.—PEANUTS—Steady; new fancy, 2%c.; strictly prime, 2%c.; common, 1½@2c. Spanish, 90c. per bushel. COTTON MARKETS NEW, YORK, May 2 .- COTTON-The

bulk of to-day's business and the chief price changes in cotton to-day were made during the first hour. The market, as a whole, was an unsatisfactory affair, speculation being limited mainly to professional operations on an evening-up sort, while the course of values was dominated almost entirely by a prominent Wall-Street house. The news at hand was too near a stand-off to afford longs or shorts positive advantage, and neither side made concerted efforts to improve its position. The opening was steady at an advance of 1 to 5 points, based on firmer Liverpool cables, bad crop news from part of the belt, together with a flurry of buying for Wall-Street account, soon placed prices at a level 5 to 10 points above last night's close. For the rest of the day fluctuations were too narrow to call for further comment, and at times business was almost at a standstill. Receipts were about as expected. Early in the day some 7,000 May notices were issued by a Greek export house, but were readily taken up by Philadelphia and other shipping interests. The feature of the Liverpool cables was sales of 1,500 bales of spot cotton in the spot market, said to have resulted from improved prospects for Manchester trade with India and a concession of 1-32d, by seliers. The market closed quiet and steady at a net advance of 4 to 5 points.
